

COVID-19 Considerations for the 2021 Seacoast Half Marathon

- There will be fewer racers on the course this year.
- We ask all in-person racers to wear masks when inside Portsmouth High School.
- There will be extra hand sanitizers at numerous locations in the check-in area at Portsmouth High School.
- All volunteers on race day will be wearing masks.
- There will be extra spacing between portable toilets at Portsmouth HS.
- Please change to the “virtual” race if you have had contact with anyone who tested positive for COVID-19 within 2 weeks prior to race day.
- We are minimizing activities at the start area to move people onto the course as quickly as possible.
- There will be water stops on the course, but we encourage you to carry your own water/sports drinks for this year’s race.
- All water stops will be self-serve.
- At the finish of the race, we will not host an award ceremony, but will have those who earned an award pick them up at a separate table in the finish area.
- We will not have food stations at the finish as in prior years, but will provide “grab and go” bags with food and water so you can finish the race, take a bag, and head out.
- Spectators will be encouraged to be masked and to maintain good physical distance from others.
- We are monitoring State of NH protocols in place for road races, and will adhere to those protocols.

We are committed to doing all we can to host a successful race while protecting the health of our racers and volunteers.
